

Vessel Arrest Launcher

The Vessel Arrest Launcher is a portable pneumatically powered tool that deploys an entanglement line to disable suspect vessels. Highly flexible, it provides vessel-stopping capabilities in a “point-and-shoot” method.

Constructed from aluminum and stainless steel, with hard-anodized aluminum components, the Vessel Arrest Launcher uses compressed air to launch an entanglement web without generating a flash, heat or noise. It delivers a safe and accurate protection solution where needed and can be fully immersed in seawater.

Perfect as a “Method of Entry” or “Defensive Tool,” the Vessel Arrest Launcher provides multi-role capabilities that compliment the operator’s requirements in all urban, altitude and maritime operations.

Vessel Arrest Launcher Contents

Item	Contents
Vessel Arrest Launcher Kit	1 x Vessel Arrest Launcher 2 x Vessel Arrest VA10 Propeller Entanglement Devices 2 x Deployment Containers 1 x Spares (O ring service kit, lubricant, tools) 1 x Transit/Storage Case
Launcher Accessories	Lightweight Flexible Ladder – 9m, 12m, 15m or 20m Climbing Lines – 7mm, 8mm, 10.5mm & 12mm Messenger Lines – 4mm & 6mm
Package Guidance	Vessel Arrest Kit – 1 x VAL, 2 x VA10 Kits, Accessories Training – 3 day Train the Trainer Tactical Training – 2 day Tactical Course

Vessel Stopping Specification

- Deployment pressure can be set from 10 bar up to 100 bar
- Range up to 24 metres with VA10 Entanglement Device
- 0.5cc air cylinder giving 12 shots
- Weight 12kgs

Capabilities

- Vessel Arrest Deployment – VA10
- Line Deployment 3mm to 14mm
- Ladder Deployment 9m to 20m

Accessories

- Boat mount
- Flat butt
- Lines & ladders
